Arizona's "How To's"

Behind-the-Scenes Tours of Factories, Farms, Breweries, and More!

Have you ever wondered how golf clubs or ice cream cones are made, or perhaps wondered what it was like to be a paleontologist or penguin caretaker? Perchance you have pondered what it takes to farm shrimp in the desert or what goes into your favorite lager. This is a list of places that offer backstage tours and access to unique experiences normally off-limits to the general public. Why search the internet to learn how things are made, when you could get an up-close view and see for yourself?

Factories:

Northern Arizona:

FLAGSTAFF: [Joy Cones](#) is the largest ice cream cone company in the world, baking more than 1.5 billion cones per year. Tours of the Flagstaff facility must be scheduled in advance and are offered only during the months of September, October, November, December, January and February on most Wednesdays and Thursdays. Many tour dates are for school and community groups, but a select number are set aside for the general public. Email the Administrative Assistant at flag.tours@joycone.com to book a tour.

FLORENCE: [Florence Copper](#) offers site tours and access to their technical experts. Visitors come away with a better understanding of how Florence Copper operates its Production Test Facility. The Florence Copper Project is possible because of a rare copper deposit located in the Historic Copper Corridor of Arizona. The unique extraction process occurs deep in the bedrock but without open pits, tunnels, or the large equipment typically associated with traditional mining. It involves a simple combination of physics and basic chemistry to dissolve and then pump copper-rich solution to the surface. Once at the surface, the solution is converted into large sheets of up to 99.999% pure copper cathode. Tours typically start at 10 a.m. and last about two hours. Call or visit the website to make a tour reservation.
